SUMMARY

Final-year BCA student with hands-on experience building full-stack web applications using Java, Spring Boot, React, MySQL, and REST APIs. Developed and deployed an AI-powered Job Application Tracker featuring JWT authentication, AI-driven resume analysis, cover letter generation, and cloud deployment. Strong foundation in backend development, problem-solving, and software engineering principles, with 50+ LeetCode problems solved and a passion for building scalable applications.

EDUCATION

Bachelor of Computer Applications (BCA) in Computer Applications 2027
GLA University, Mathura

SKILLS

- Java · Advanced
- Spring Boot · Advanced
- Spring Security (JWT) · Intermediate
- React.js · Intermediate
- JavaScript · Intermediate
- MySQL · Advanced
- REST APIs · Advanced
- Docker · Intermediate
- Git & GitHub · Beginner
- HTML · Advanced
- CSS · Intermediate
- Spring AI · Intermediate
- Problem Solving · Intermediate
- Communication · Intermediate
- Team Collaboration · Intermediate

- Hindi · Native
- English · Professional

PROJECTS

AI-Powered Job Application Tracker <https://ai-job-application-tracker-seven.vercel.app>
Developed and deployed a full-stack AI-powered Job Application Tracker using Java, Spring Boot, React, MySQL, Docker, and Spring AI. Built 25+ REST APIs and implemented secure JWT-based authentication and authorization with Spring Security. Integrated AI-powered features including resume analysis, ATS feedback, job description matching, skill gap analysis, and personalized cover letter generation. Designed and managed a relational database with 6 core entities for efficient application tracking and notes management. Containerized the backend using Docker and deployed the application on cloud platforms, with the frontend hosted on Vercel and the database managed through Railway. Created a responsive and user-friendly interface to provide a seamless experience across devices.
