PROJECT

AWS-Hosted React Website

Aug 2026- October 2026

Developed a static React website and deployed it using AWS S3 static website hosting, gaining hands-on experience with cloud deployment and AWS fundamentals

Spring AI RAG Q&A System

May 2026- June 2026

Built a document-based question-answering system using Spring AI, Apache Tika, PostgreSQL with PGVector, and semantic search to retrieve relevant information from PDFs.

AI-Powered Job Application Tracker

Dec 2025- Feb 2026

Developed a full-stack job tracking platform with 25+ REST APIs, JWT authentication, AI-powered resume analysis, ATS feedback, job matching, and cover letter generation.

SKILLS

- Java
- Spring Boot
- React.js
- REST APIs
- MySQL/ PostgreSQL
- AWS
- AI/ RAG
- Docker
